The Army Workload and Performance System (AWPS) Environment is a centralized database, web-based application used to manage Maintenance, Logistics, and Workload and Performance for several Army and National Guard activities.  
AWPS is for UNCLASSIFIED use only.

Login User ID:   
Password:   
PKI Issuer: DOD CLASS 3 CA-5  
PKI Subject: GEDGE, MICHAEL S. 1258525775  
Valid From: 9/20/2005  
Valid Until: 9/19/2008 11:59:59 PM

Access to AWPS requires that you always use the same PKI Certificate that is registered to your AWPS account.

If this PKI Certificate is different from the one you previously registered, or if you previously were approved for access without a PKI Certificate, you can register this new PKI Certificate to your AWPS account by following these instructions:

- First note, when you perform this process, your AWPS account MAY be locked and access denied if this PKI Certificate is not from a valid DoD Issuer and does not match your AWPS identity information.
- ☐ Check to certify that you want to register this PKI Certificate to your AWPS account.
- Enter your Login User ID and Password above, then click "Begin Login".
- The Login process will register this new PKI Certificate and validate it's authenticity. If valid you will see the normal AWPS application page. If not validated then the AWPS Helpdesk will be notified to verify your access, you will then be notified via e-mail when your access is approved or denied.

If you need assistance please contact the [AWPS Helpdesk](#).
